

Sonography – Medical Imaging

Medical Imaging Services

We offer state-of-the-art technology, an excellent work environment and career opportunities with room to grow. Island Health employs CT/Medical Radiographers, Nuclear Medicine Technologists, Mammographers, Sonographers, and Cardiac Sonographers. We employ both experienced professionals and new graduates as General and Cardiac Sonographers with some shared service opportunities. We are always looking for more staff to compliment our hard working, dedicated teams.

General Sonography

Our departments range from outpatient clinics and community hospitals throughout Vancouver Island to tertiary referral centres located in Victoria. The Victoria facilities include dedicated breast imaging, genetic screening and high risk antenatal assessment, and vascular labs.

Cardiac Sonography

Our Heart Health Centre of Excellence in Victoria is a national leader, providing interventional procedures, elder-friendly initiatives and outpatient rehabilitation programs and clinics. Our advanced techniques in echocardiography make us one of the best training sites in ultrasound. Our digital Echocardiography Lab performs 15,000 procedures per year including Transthoracic, Transesophageal and Stress Echocardiogram with 3D Technology.

Our Sonography Teams

Our team is comprised of graduates of recognized Sonography programs who are registered with the American Registry of Diagnostic Medical Sonographers (ARDMS) and/or Sonography Canada. Typically we require one year recent related clinical experience including peripheral vascular imaging and Doppler however we will consider an equivalent combination of education, training and experience.

State-of-the-art Diagnostic Equipment

We are committed to providing our professionals with state-of-the-art diagnostic equipment. Strong vendor agreements provide for ongoing upgrades and replacement systems that put advanced imaging technology at the Sonographers' fingertips, and professional practice support is online for quick access anywhere in the region.

Continuing Education

Continuing education for staff is facilitated island-wide with support available for local, regional and national events. Additionally, all sites participate in the training and mentoring of tomorrow's professionals. And of course, there are the great people to work with throughout the region.
